ABOUT

TomTom is a Dutch multinational technology company that specializes in navigation and mapping products, software, and services. The company was founded in 1991 and has its headquarters in Amsterdam, Netherlands. TomTom's products include GPS navigation devices, sports watches, and fleet management solutions. The company also offers software solutions for smartphones and tablets, including mapping applications and traffic information services.

CHALLENGE

TomTom was seeking for a storage solution that can complement a desk booking system in their newly built hybrid workplace.

THE PROJECT

Fonzel designed, manufactured, and installed over 780 Smart Lockers equipped with Vecos V3 locks and premium laminate to efficiently cater the storage need of over 1000 employees of TomTom's Pune facility. This success story of Pune office sparked interest from other TomTom offices in Europe and now Vecos is the preferred Smart locking technology adopted by TomTom globally.

THE RESULT

The installation of well-organized storage solution from Fonzel has resulted in reduction of 220 lockers from TomTom's traditional storage system. This smart storage system was promptly adopted by employees working in hybrid mode as this enabled them with an easy access to booking lockers from remote locations , offering the option of using along with a Desk Booking App.

Fonzel Smart Locker solution has enhanced flexibility for employees, needed to thrive in a hybrid work environment, by providing safe and secure access to their belongings. They can now avail hassle free & quick access to their belongings with a 'tap' of their RFID card against a locker overcoming past hassles of lost keys and forgotten codes.

The facility team of TomTom is at peace as they have no dependency on solving the locker allocation and key maintenance issues. The locker management dashboard extends a complete overview of the entire locker inventory and displays real time status of an individual locker.

Adding or deleting user or user credential is just over the fingertips!
